

## Health and Family Supports Worksheet

- Use the information on the excel sheets to talk through each measure as a group and give each one a 1, 2 or 3 for each criterion:
  - 1 = Meets the criterion clearly
  - 2 = Doesn't meet it as strongly/clearly as others
  - 3 = Doesn't meet the criterion
- Add the numbers and enter in the SUM column for each measure.
- Fill in the column for each one on whether collecting the data would be a shorter-term or longer-term effort.
- As a group, use those values to help you recommend 2 shorter-term and 2 longer-term priority data measures for NC to start working on collecting.

Measure	Advances racial equity?	High benefit for resources/ effort?	Support ECAP/ ESSA?			SUM	ST or LT?
